

# Michael Larimore

## Senior Applications Developer

10 years of experience in application development using PHP/MySQL/Linux. Solid understanding of PHP 5 and 7 in scripting and OOP code bases. Worked with big data sets using MySQL and ORM modeling to optimize concurrent requests and scalability. Worked in Agile development methods such as Kanban and Scrum using JIRA. Ready to take on new technologies (ie NodeJs, Python, etc...). New Interests include and not limited to MEAN/MERN stack architecture, Python Django Framework, MQTT server for IoT.
